

officer, was laid over until next Wednesday morning. PHILADELPHIA, Pa., March 29, 1855. The same officers, who were committed by the City of Philadelphia, were committed by the City of Philadelphia.

COMPLAINT OF ROBERT ARMSTRONG.—Eugene Company No. 2, against his foreman, John Layman, for drunkenness and assaulting him at a fire.

The FOREMAN said that the complainant had disputed his authority, and used abusive language toward him.

The CHIEF ENGINEER said the Foreman was drunk on the occasion in question, and he had to give him in charge of a policeman.

The FOREMAN retorted that he was not drunk, but highly excited; and that the complainant, Armstrong, was a drunkard, and that he had to give him in charge of a policeman.

The CHIEF ENGINEER said that he was not drunk, but highly excited; and that the complainant, Armstrong, was a drunkard, and that he had to give him in charge of a policeman.

The CHIEF ENGINEER said that he was not drunk, but highly excited; and that the complainant, Armstrong, was a drunkard, and that he had to give him in charge of a policeman.

with section 2 of said Act, cause all such vessels to be taken to the Police Station, to be dealt with as provided in the Act. By order of FERNANDO WOOD, Mayor, by JOHN A. MATTRELL, Chief of Police.

THE ROW IN A PORTER-HOUSE.

The Eighth Ward Police were informed, about 10 o'clock on Tuesday night, of a disturbance then going on at the Porter-house, No. 338 Hudson-st., known as the "Weaver's Arms," and two officers repaired to the place and found a man named John Scott lying dead upon the floor, and three men fighting in another room. These were all arrested and taken to the Station-house, where, also, the body of the deceased was brought. It was thought at the time that Scott had been killed in the fight, but yesterday Coroner O'Donnell held an inquest upon the body, when a different state of circumstances was revealed. It appeared in evidence that he came to the place intoxicated, and continued to drink freely; that he and one Daniel Dever commenced skylarking and continued for some time, without exhibiting any angry feelings toward each other. Some hours afterward, they resumed their play, when the deceased became angry. John Connor, an acquaintance, then interfered, and seated him in a chair, after which he became more excited, and called to his son, who was in a back room, to come to his aid. The son came, and struck Connor in the face, and a regular fight ensued in the back room, and while it was going on, the deceased, who was sitting in the front room, fell from his chair, and died of apoplexy. It was in evidence, further, that the deceased was of very intemperate habits, and that no violence had been inflicted upon him. The jury rendered a verdict of death by serious apoplexy, superinduced by intemperance. The deceased was a native of England, 47 years of age.

CITY ITEMS.

James T. Brady, Esq., will lecture before the Mechanics' Institute this evening. Subject—Influence of Useful Inventions on Social Life.

We call attention to the advertisement announcing the close of the exhibition of Vernet's picture of Joseph's Brethren at Messrs. Goupil & Co.'s.

ALL RIGHT.—Yesterday we made a call at the Corn Exchange, No. 15 William-st., and found that the proprietor had determined that no person should get cornered there; for in the place of a bar with intoxicating liquors and men to pour it out, he had a large counter filled with pastry, fruit, and tea and coffee, and several neat young ladies to attend. This is the place we referred to some days since. The proprietor has abolished his bar, as he said he would. Success to him.

EAST RIVER INDUSTRIAL SCHOOL.—We desire to call the attention of the readers of THE TRIBUNE to a new "Industrial School," which is being started in Fortieth-st., between Third and Second-av. It is designed to reach that most needy population who occupy "Dutch Hill," and all the district from Third-fourth to Fifth-fifth-st., near the East River. There is not a more needy, hard-pressed quarter in the City. We have visited hundreds of families there that have had no work for the whole winter, and have literally lived on charity. We stumpled yesterday on a poor man dying of consumption, with a well-thumbed Bible before him, who had literally nothing in the house to eat for himself or family. The oldest child gets her food and her education in this school. Ladies have come forward to aid in the teaching and the industrial work; but more teachers and more funds are needed. We are aware that the object does not appeal so much to immediate pity or feeling as to some others; still, it is such enterprises which will keep off future poverty and ignorance and crime. A little money and effort laid out now may save many a poor outcast girl hereafter. We especially appeal to the citizens of that part of the City for aid. Donations can be sent to the school in Fortieth-st., or to the office of the "Children's Aid Society," 11 Clinton Hill, Astorplace.

SCHOOL EXAMINATION.—The regular examination of the Male Department of Grammar School No. 40, in East Twentieth-st., took place yesterday afternoon, before City Superintendent S. S. Randall, Assistant McKean and about 300 ladies and gentlemen. The examination took place in the Chapel. The scholars numbered 550. Three classes were examined, the highest in Grammar, Arithmetic and Algebra, showing good progress in the different studies. There were some fine specimens of drawings, designs and lettering, with the pen, which were much admired by the visitors.

APPOINTMENT OF CLERK.—Judge Betts, of the United States District Court, has appointed George F. Betts, Esq., Clerk of the U. S. District Court of this District. Mr. Morton, the late incumbent, will occupy the position of Deputy Clerk, also U. S. Commissioner, &c.

We call attention to the advertisement in the column of "Special Notices," of a meeting of Associationists and friends of the North American Palanquin, to be held this evening, at No. 553 Broadway. It is hoped that all who take an interest in the subject of Association, will be present.

J. H. Colton & Co. have issued a new map of Kansas and Nebraska. It has all the new routes of railroad across to the Pacific, (crossing the Territories,) all new towns, villages, &c., &c.

CHARGE OF GRAND LARCENY.—A NEW DODGE. Yesterday afternoon, a well-dressed man called at the store of James George & Bro., boot and shoe dealers, at No. 17 Murray-st., and asked to see a Director. One was handed him, and he wrote some name upon a slip of paper, and walked out, thanking the person who loaned him the Directory. When he reached the sidewalk, he met a man to whom he handed the paper, who, after reading it over once or twice, deliberately shouldered a case of boots, valued at \$54, which was in front of the store, and walked off with it in one direction, while the pretended employer went in the opposite one. The proprietor of the store had watched the operations, and soon after the man with the box had started, followed him; and, having arrested him, took him to the Chief's Office, and he was locked up—protesting that a shopman had hired him to take the goods to his store in Fulton-street.

ARREST OF POLICE DEALERS.—The Eleventh Ward police yesterday made a descent upon the shop of several lottery dealers, all Germans, and arrested the proprietors, besides capturing their schemes, blanks, slips, and all the paraphernalia of their business. The names of the unfortunates are, Conrad Kobb, of No. 214 Third-av.; Cornelius Sullivan, of No. 21 Avenue B; Cohors, of No. 396 Ninth-st.; John Lohr, of No. 315 Third-av., and Martin Kember, all of whom were taken before Justice Wood, at the 11th District Police Court, where they had been but a short time, when a host of their German friends made their appearance and a general jabbering in High Dutch commenced, which was finally put a stop to by the magistrate holding the accused for examination.

FIGHT BETWEEN ONE OF THE POOL GANG AND ANOTHER PARTY.—On Tuesday night the Twenty-second Ward Police were informed that a fight was going on at the run-grocery of John T. Tietman, corner of Fifty-second-st. and Tenth-av., and, immediately, Sergeant Downs and a posse of officers repaired to the place, and found the fighters engaged in a desperate conflict in the street, in front of the grocery. One gang was headed by Bill Travis, late of the Pool party, and the other by Peter Ferguson. These two men, together with Samuel Carl, Thomas Riley, John Nichols, Thomas O'Donnell, and George Whitman, were arrested, and committed by Justice Connolly for examination.

MURDERER ASSAULT.—Wm. Steuber, a German, driving a large beer wagon for Frank W. Schwaartz, of No. 73 Chatham-st., was sent, yesterday, with a keg of beer to the oyster-collar of J. Regus, No. 131 Canal-st., with instructions not to leave the keg unless it was paid for. He took the beer to Regus's place, but the latter refusing to pay for it, he was about leaving with it, when Regus seized him by the collar, and struck him a violent blow upon the head with an oyster-knife, inflicting a deep and dangerous wound. The injured man was immediately conveyed to the residence of his employer, and now lies in a precarious situation. Regus was arrested by Officer Mansfield, and committed by Justice Bogart to the Tombs.

RAN AWAY AND DEATH.—A horse, attached to a light wagon, ran away in Eighth-av., yesterday morning, and when near Thirtieth-st. took to the sidewalk, and plumped into the window of a crockery store. The glass was heavy plate, and cut the animal so severely that he bled to death on the sidewalk.

SERIOUS ACCIDENT TO A POLICEMAN.—Yesterday afternoon Sergeant Liddy, of the Reserve Corps, one of the most gentlemanly and efficient officers of the Police Department, was knocked down and run over by a heavy stage wagon, and his left leg fractured. He was engaged at the time in endeavoring to carry out the instructions of the Mayor to the Police, and was on his way to the City Hall. As soon as possible, on meeting with the accident, he was immediately conveyed to the N. Y. Hospital.

TAKEN FROM A SUSPICIOUS CHARACTER.—Two valuable silver robes and a quantity ready-made clothing, which are supposed to be stolen property, were yesterday taken from a suspicious character, and are now in the possession of Wm. Mackellar, Clerk of the Chief of Police.

CHARGE OF EMBROIDERY.—Joseph P. Murtha, keeping a dry goods store at No. 364 Bowler-st., was yesterday charged with the charge of embroidery, and was committed to the City Jail.

CORRECTION.—The report in THE TRIBUNE of yesterday, relating to the case of the woman of the Fourth Ward, is corrected. The woman is not a woman of the Fourth Ward, but a woman of the Fifth Ward, and is not a woman of the Fourth Ward, but a woman of the Fifth Ward.

DR. HUNTER ON CONSUMPTION.—(continued.)

ON TUBERCLES AND CAUTERIZATION IN THE LUNGS.

LETTER No. XIV.

To the Readers of THE N. Y. TRIBUNE.

In my preceding letters I have described the different kinds of Consumption and their symptoms. I have also told you that "Catarrh," "Sore Throat," and "Bronchitis" lead to Consumption. I will now explain to you how these three diseases are the only chronic inflammations of the mucous membrane of the nose, the throat and the bronchial tubes, and do not differ in any respect from chronic inflammation of the mucous membrane of the stomach or bowels, or of any other surface of the body—lead to Consumption. The reason why the same disease in the stomach or bowels does not produce Consumption, is that it does not interfere with breathing—Consumption, is that they cannot exist without interfering with breathing. When the lungs are inflamed, they are unable to purify the blood—and when this is the case, we are liable at any moment to have tubercular disease. Nature will generally use us for a time by coughing off the blood impurities through the lungs, the bowels, or the skin, but sooner or later little spots of grayish matter begin to form in the lungs, and in the long run they are very small in size, and look not unlike millet seed, from which doctors can see that the tubercular portion of the upper part of our lung. We find them in the smaller air-tubes, in the air-cells, and even beneath the mucous membrane.

When this action begins, in apparent health, without pain, or cough, or hemorrhage, or any of the usual warnings of danger, we have these germs of destruction in our lungs. These germs, if not removed, will grow and multiply, and will become a source of danger to the system. The little spots, which are called tubercles, are in fact, a kind of cancer, and will grow and multiply, and will become a source of danger to the system. The little spots, which are called tubercles, are in fact, a kind of cancer, and will grow and multiply, and will become a source of danger to the system.
